

Dear parents,

We had a short class on Oct 25 due to Diwali celebration. We started the topic of Indian Geography.

We revised the neighboring countries of India and the 3 big oceans surrounding India (it was done in Culture II). Kids were able to locate them on the map of India as well.

I taught the physiographic regions of India

- Himalayas
- Indo - Gangetic plains
- Thar Desert
- Deccan Plateau
- Eastern Ghats
- Western Ghats
- Bordering seas

The kids did a good job of identifying / showing the state/city (on the Indian map) from where their parents/grandparents come.

The homework is to write the neighboring countries and states of India.

Please let me know if you have any questions / concerns.
